Saint Petersburg, RU

Education

- Saint Petersburg State Polytechnic University, applied mathematics and informatics, bachelor (2018-2021)
- "Deep Learning" course by Tinkoff Education (2021-2022)
- Specialization on Machine Learning and Data Analysis by MIPT & Yandex (2021-2022)

Hard Skills

- Advanced Python (numpy, scikit-learn, pandas, tensorflow, dash, statsmodels): data collection, transformation and aggregation, calculation custom metrics, calculation of unit economy metrics, KPI. Testing statistical hypothesis, design, set up and analysis of AB tests and other statistical experiments, calculation of effect size, power and p-values. Using data to make statistical inference, building predictive models using scikit-learn and/or xgboost, time series analysis and prediction using tensorflow.
- Intermediate SQL for ETL purposes: aggregations, window functions, subqueries, CTE.
- Basic knowledge of R, usage of main statistical packages for
- Excel (pivot tables and basic VBA) & dash / Tableau for creating visualizations, charts and plots. Creating analytical stories and dashboards either with python or with Tableau.
- Business analytics, cohort analysis. User segmentation (also with machine learning methods)
- Git for version control
- Some of my works can be found [here](#).

Work Experience

- Skypro (Skyeng) data analyst internship: august 2021-- january 2022
- GoStudent (python and math tutor): may 2021 – present

Soft Skills

- Github, work with task trackers and task planners (Trello, Slack)
- Wide range of interests and technical erudition, constant will to deepen and broaden horizons
- Strong interpersonal skills, well-doing in team works and projects
- Perform well in terms of multitasking.
